The Berlin Wall: Symbol of a Divided Europe

American Nuclear Test, 1954

Mutually Assured Destruction Under a Peaceful Prairie

What was the Cold War?

The Cold War began just after the end of World War II. Conflict arose between the United States and Soviet Union - the remaining superpowers - because of their different economic and political systems. The Soviet Union was based on communism, the U.S. promoted democratic capitalism. Neither side ever fought the other directly in a hot or “shooting war,” due to the looming threat of a nuclear war. Instead, each side tried to gain an advantage in a variety of ways. These included an intense political competition, economic rivalries, propaganda, and a massive arms buildup that dominated foreign policy and international affairs. The two distinct ideologies divided the world. In 1946 British Prime Minister Winston Churchill called the division line in Europe the “Iron Curtain”, with capitalism to the west and communism to the east.

The Arms Race

The buildup of nuclear weapons was one way the Cold War was fought. Between the opposing sides, over 80,000 nuclear weapons were constructed. While none of these were detonated in a hot war, over 1,800 tests were conducted. The arms race nearly led to World War III several times, one of which was the Cuban Missile Crisis in 1962. At one point, the world’s nuclear stockpiles totaled a chilling 18,000 megatons. By comparison, the entire explosive force of all the bombs used during World War II was 2 megatons. Reflecting on the impact these weapons could have on the world, former U.S. Secretary of Defense Robert McNamara once said, “nuclear weapons have no military utility whatsoever, except to deter an enemy attack.”

1945 - Atomic bombs dropped on Hiroshima and Nagasaki to end World War II

1946 - Churchill gives Iron Curtain Speech

1949 - Soviet Union explodes atomic bomb

1952 - United States explodes hydrogen bomb

1953 - Soviet Union explodes hydrogen bomb

1956 - Khrushchev tells U.S. *"We will bury you."*

1957 - World's first satellite, Sputnik, launched by Soviet Union

1959 - Nikita Khrushchev visits USA

Destruction at Hiroshima

Sputnik satellite

Soviet leader Nikita Khrushchev

Watching a missile test launch

1961 - Soviet Union places first man in space, Yuri Gagarin

1961 - Berlin Wall built

1962 - Cuban Missile Crisis

1962 - First Minuteman Missiles become active on October 27th in Montana

1969 - U.S. lands on moon

1972 - SALT I agreement signed - first treaty limiting nuclear arms

1972 - U.S. President Richard Nixon visits Moscow

1973 - Yom Kippur War, U.S. forces go on worldwide alert

1975 - Soviet hydrogen bomb creator Andrei Sakharov gets Nobel Peace Prize

1983 - U.S. President Reagan proposes Star Wars

1986 - Chernobyl nuclear power plant meltdown disaster

1987 - Reagan gives "Tear Down that Wall" speech in Berlin

1989 - Berlin Wall comes down

1990 - Germany reunifies

1991 - START Treaty signed by U.S. President George H.W. Bush and Soviet President Mikhail Gorbachev

1992 - Declaration ending the Cold War signed by the Soviet Union and the U.S.

1999 - Minuteman Missile National Historic Site designated

Signing of START Treaty in 1991

Minuteman Missile National Historic site is the only unit of the National Park Service designated to tell the story of the Cold War. Minuteman Missile NHS commemorates the role of the Minuteman Missile System in preventing nuclear war and preserving peace for over 30 years, and the men and women who made it possible.
